## Bespoke Permanent Recruitment Solutions

Premier Technical Recruitment excel in the provision of bespoke permanent recruitment solutions to the major engineering sectors throughout the UK, including Automotive, Aerospace,

Nuclear, Defence, Pharmaceutical, FMCG and Materials Handling, and supply these technically demanding and unique sectors with engineers allied to the following areas:

### Maintenance

### Design

### Logistics

### Manufacturing

### Controls & Process

### Quality

### Service

### Purchasing

## Maintenance

Since Premier Technical Recruitment began, there has been a dedicated Maintenance Division covering the UK in its' entirety, and consistently delivered highest quality recruitment solutions to a diverse range of engineering and manufacturing environments throughout the country. Across all of the major engineering sectors covered, Maintenance positions are a core area of our business, with roles always available in the Food, Automotive, Materials Handling and Distribution arenas.

Whether your requirement is multi-disciplined, or perhaps mechanically or electrically biased, and working on one of the many shift patterns available or simply on a permanent days basis, Premier Technical Recruitment Ltd excel in the introduction and placement of Permanent Maintenance engineering professionals to any market sector anywhere in the UK.

Skilled in establishing exactly what your organization needs in terms of Control software experience, skills bias and the vital "person fit" in your existing established maintenance team for best results, let us demonstrate our experience in this area to you when you next have a requirement in this area. We are confident you will be impressed with the results.

Similarly, if you are a Maintenance Engineer of any bias, with experience in any of the sectors detailed above, then contact the Maintenance Team on 01827 68400 or email your cv to: [enquiries@premiertechnicalrecruitment.co.uk](mailto:enquiries@premiertechnicalrecruitment.co.uk)

for a confidential discussion regarding your specific requirements. In addition to detailing relevant current vacancies in your area, we will also be able to proactively approach clients on your behalf on a speculative basis ensuring you receive maximum (whilst completely confidential) coverage in your new job search.

## Design

Having established relationships throughout the UK with a diverse range of clients in many engineering sectors, the Design team within Premier Technical Recruitment specialize in the introduction of permanent design personnel for many applications, from Automotive and Aerospace component design, to special purpose machinery consultancy allied to the materials handling and manufacturing sectors.

For Mechanical design professionals, we are able to identify a selection of technically challenging opportunities that will utilize skills in 2D & 3D Solid and Surface Modelling applications using a range of design tools including ProEng, Catia, AutoCad, SolidWorks and Mechanical DeskTop with Consultancies and Manufacturers respectively.

For Electrical design engineers, we work with a range of Automation and Special Purpose Machinery organizations that seek experienced professionals able to undertake complex panel design, integration of associated control software and often project manage the process from concept through to handover.

If you are a Design candidate and would like to learn more regarding opportunities in your area, then call the Design team on 01827 68400 or email your cv to: [enquiries@premiertechrecruitment.co.uk](mailto:enquiries@premiertechrecruitment.co.uk) for a confidential discussion regarding your specific requirements.

Alternatively, if you are an organization seeking to recruit a design professional to compliment your existing team, then do not hesitate to contact us so that we are able to gain an insight into your specific requirements and present relevant solutions as a priority.

## Purchasing

## Logistics

The competitive and fast paced Logistics arena is worth almost £60 billion to the UK economy each year, employing almost 2 million people between more than 60,000 organisations.

Within the Logistics team, Premier Technical Recruitment cover a range of industries including the Food and FMCG sectors, Retail Warehousing and Distribution sectors, and provide permanent recruitment solutions based on both a contingency (search and selection) and head hunt basis.

Typically, the nature of vacancies successfully satisfied in the division include Maintenance & Engineering Managers, Supply Chain engineers and Purchasing & Procurement professionals at all levels. In addition, working closely with the Manufacturing Division, positions allied to Lean Manufacturing and Continuous Improvement are also regularly identified and successfully resourced.

If you have a vacancy in this specialist sector and need expert advice on the best way to find suitable candidates, or if indeed you currently work within the Logistics sector and are keen to learn more regarding current opportunities within this exciting field, then email: [enquiries@premiertechnicalrecruitment.co.uk](mailto:enquiries@premiertechnicalrecruitment.co.uk) or call us on 01827 68400 for a confidential discussion concerning your specific requirements.

## Manufacturing

Covering an exciting and diverse range of industry sectors, the Manufacturing Division of Premier Technical Recruitment are regularly tasked with the identification and introduction of skilled and experienced manufacturing and production professionals for roles throughout the country.

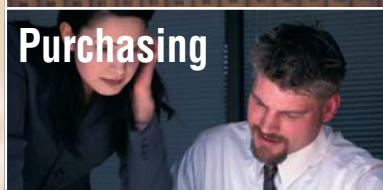

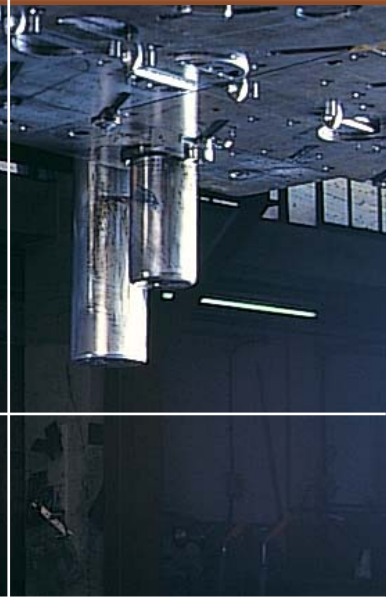

With any manufacturing organization seeking to improve quality, reduce costs and increase production, comes the need to have focused and committed continuous improvement professionals in place to ensure all of these essential KPI's are achieved, and delivered on time and within budget, and Premier Technical excel in the permanent placement of Black Belt Six Sigma professionals, H&S Management Teams, Lean Manufacturing Consultants, Process and Cell Engineers, Operations Managers and Directors and Planning consultants.

Able to provide solutions to the Food Manufacturing, FMCG and Automotive sectors in particular, if you are seeking to recruit an engineer in this type of position or would like to learn more with regards to how we may assist you in recruiting this type of engineering professional, then email:

[enquiries@premiertechnicalrecruitment.co.uk](mailto:enquiries@premiertechnicalrecruitment.co.uk) or call us on 01827 68400 for an initial discussion regarding your requirements.

Alternatively, if you currently work within the manufacturing sector and are seeking a new position in any of our specialist sectors, then send an up to date copy of your cv to:

[enquiries@premiertechnicalrecruitment.co.uk](mailto:enquiries@premiertechnicalrecruitment.co.uk) and one of our consultants will contact you confidentially as a priority in order to establish your skills and career aspirations for the future.

## Controls & Process

The Controls and Process Division of Premier Technical Recruitment specialize in the identification and introduction of PLC and SCADA Software engineers for a diverse range of applications throughout the UK. Highly skilled controls professionals are a valuable asset to any manufacturing, process or distribution environment, and the Controls team consistently delivers impressive results in this highly technical and competitive sector.

Many organizations struggle to find high calibre engineers who can demonstrate experience in the conceptual design and project management of control software integration, who can develop software on a range of PLC platforms including Siemens PCS7, S5 and S7, Allen Bradley SLC500 and PLC5, Mitsubishi, Omron, Telemecanique... the list goes on. With our knowledge and experience of both candidates and clients, we specialize in understanding the requirements and skills respectively of

both candidate and client alike, and pride ourselves in our proactive approach in matching the needs of each to ensure the best solutions are identified.

Are you a PLC / SCADA software or systems engineer seeking your next opportunity in a Controls, FMCG, Materials Handling or Project Consultancy environment ?

Or are you an employer, seeking to recruit high calibre Controls professionals to compliment an existing team ?

If you would like to learn more regarding how Premier Technical Recruitment can assist you in your search, call the Controls Team on 01827 68400 or email us via:

[enquiries@premiertechnicalrecruitment.co.uk](mailto:enquiries@premiertechnicalrecruitment.co.uk) for a confidential discussion in order to establish your requirements in greater detail.

## Quality

Supplying to a range of clients across the UK, predominantly in the Automotive, Aerospace and Pharmaceutical sectors, and working closely in conjunction with the Manufacturing Division of Premier Technical Recruitment, we manage a range of Quality engineering positions, from Engineer level through to Senior Management positions, assisting our clients in the recruitment of highest calibre experienced professionals to ensure project compliance with appropriate business, customer and industry standards and procedures.

With similar skill set requirements to manufacturing opportunities, most engineering and manufacturing organizations have teams of professionals tasked with ensuring products and services meet their market requirements. Many of the quality posts we recruit for require individuals to be able to demonstrate skills and experience in Six Sigma, Lean Manufacturing, 8D, SPC and the various

dedicated industry specific quality standards.

Offering a range of permanent positions with attractive benefits packages, remuneration and career progression opportunities for suitably committed individuals, if you are able to demonstrate a Quality engineering background in any of our specialist area and are keen to learn more regarding opportunities in your area, then contact us on 01827 68400 or email your cv to: [enquiries@premiertechrecruitment.co.uk](mailto:enquiries@premiertechrecruitment.co.uk) for a confidential discussion regarding your requirements.

Equally, if you are an organization seeking to compliment your existing Quality function and are looking to recruit enthusiastic, dynamic and committed quality professionals, then call us for a confidential discussion regarding position content or email your requirements to: [enquiries@premiertechrecruitment.co.uk](mailto:enquiries@premiertechrecruitment.co.uk)
